

# Energy Management Assistance Program & Industrie 2030 Ontario Roundtable

Join us and manufacturing executives in your community to ensure your voice is heard and learn more about energy management assistance programs and initiatives available to Ontario manufacturers.

## Energy programs discussed at this event include:

- Industrial Conservation Initiative information and application process support
- Provincial Demand Response Auction
- Other programs offered through the 2015-2020 Conservation First Framework and the 2015-2020 Demand Side Management framework
- Programs offered through LDCs, gas utilities and IESO.

## Shape the future with Industrie 2030 Ontario

Manufacturers in Ontario are at the forefront of global competition, innovation, and technological change. But we risk falling behind global competitors. To succeed, manufacturing requires a business climate that is world-class.

What does that mean for you?

Industrie 2030 Ontario identifies solutions to the challenges standing in the way of manufacturers competing and growing in domestic and global markets. Based on input received, CME will write an Ontario manufacturing strategy to deliver to the new Government of Ontario in September.

For more information about Industrie 2030 Ontario please contact Valeria Quintanar at [valeria.quintanar@cme-mec.ca](mailto:valeria.quintanar@cme-mec.ca).
